

IMPLEMENTING e-Archiving API IN ODLO SOFTWARE AND DEVELOPING FUNCTIONALITIES AROUND

Claudia Mordt Barja

WHO WE ARE AND WHAT WE DO

ODILO

A team of **SPECIALISTS**
in the field (more than 50)

More than 10 years of
EXPERIENCE

INTERNATIONAL
company

EXPONENTIAL
growth

60 M €
financing round

Completely
CERTIFIED model

+ **120 CLIENTS** with archiving and preservation solutions
implemented in **INSTITUTIONS OF ALL KINDS**

Software

Integral archiving and preservation solution

Integral dissemination of digital collections

Consultancy, advice and training

Accompanying and updating services

SHARED RESPONSIBILITY: ODILO as security guarantee and compliance with standards

Assumption of custodial responsibility. Cyber risk insurance and 7M € liability insurance.

9001
quality management systems

14001
environmental management systems

27001
security of the information

Normalización Española

EN 301549
Accessibility requirements for ICT products and services

ISO 27018
Protection of personally identifiable information in public clouds

ISO 27701
Security techniques for privacy information management

ISO 14721 - 16363
OAS preservation

ISO 17068
trusted third party repository

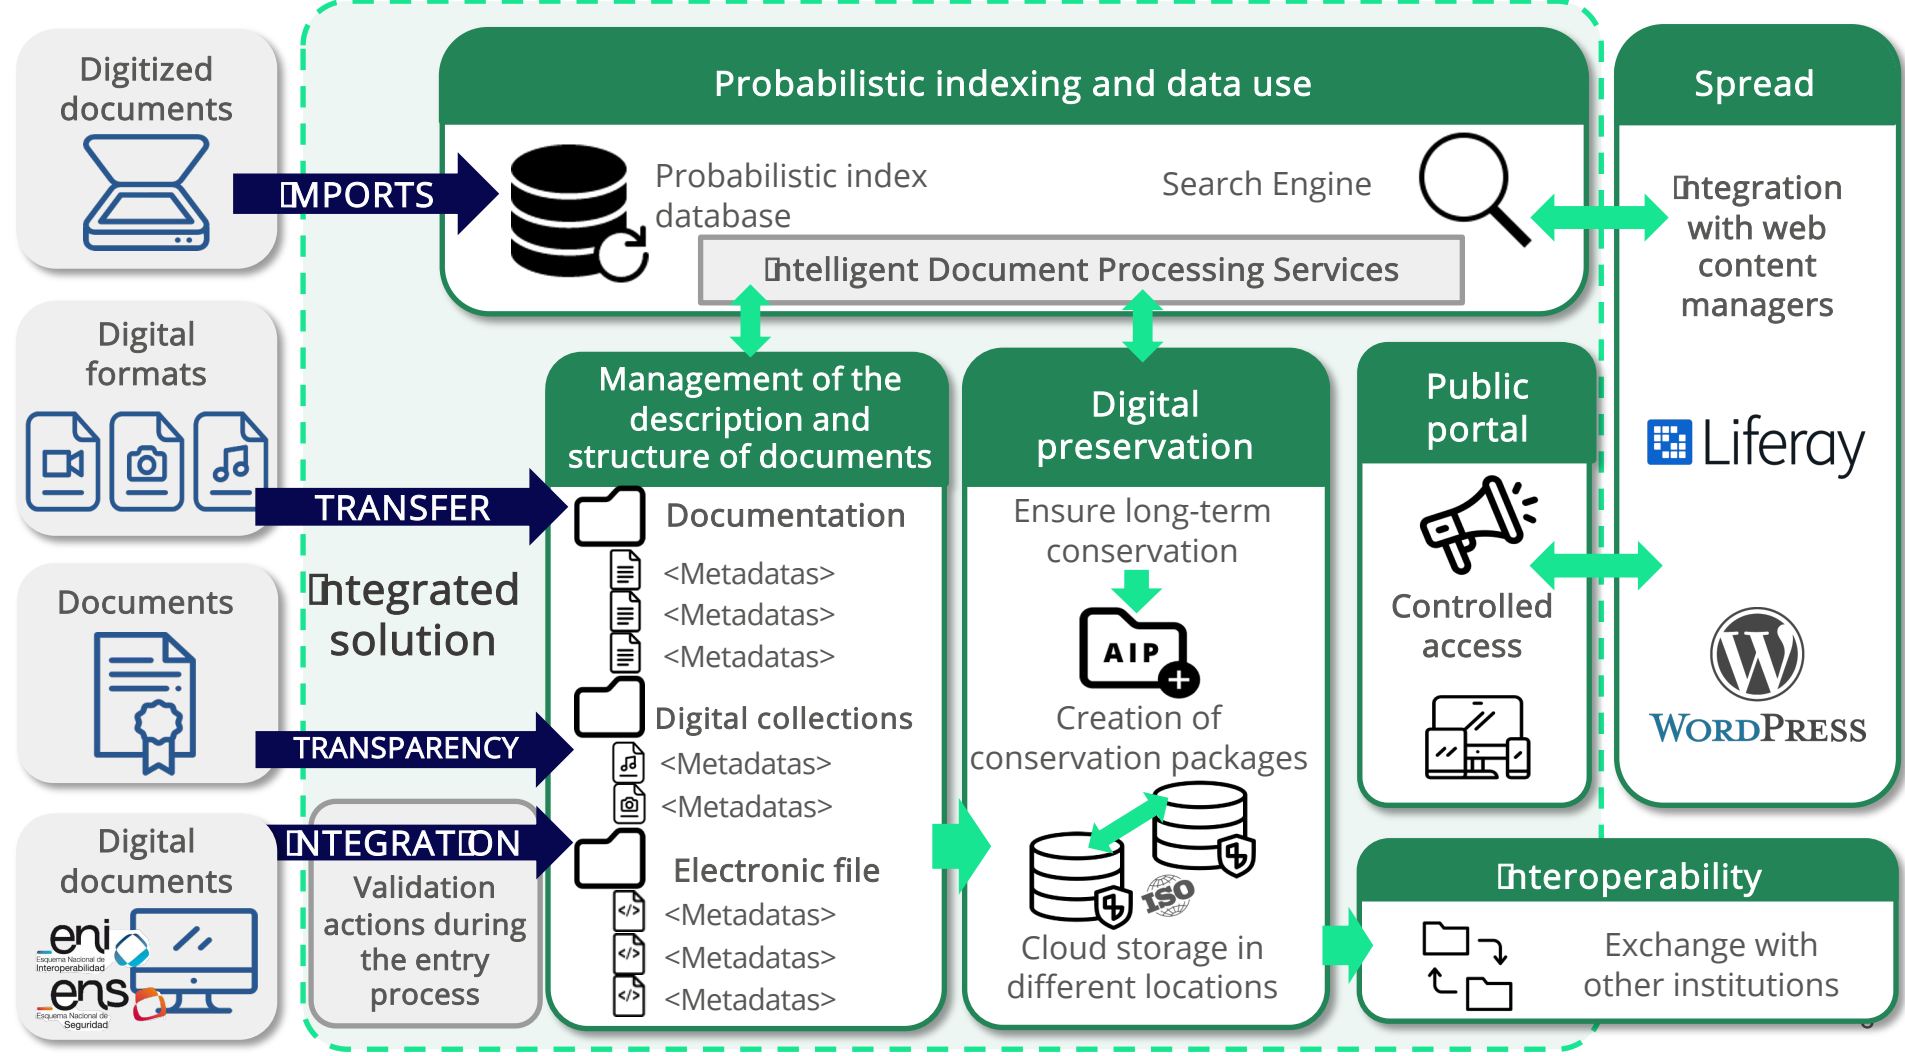

ISO 22301
continuity management systems

ISO 27017
for cloud services

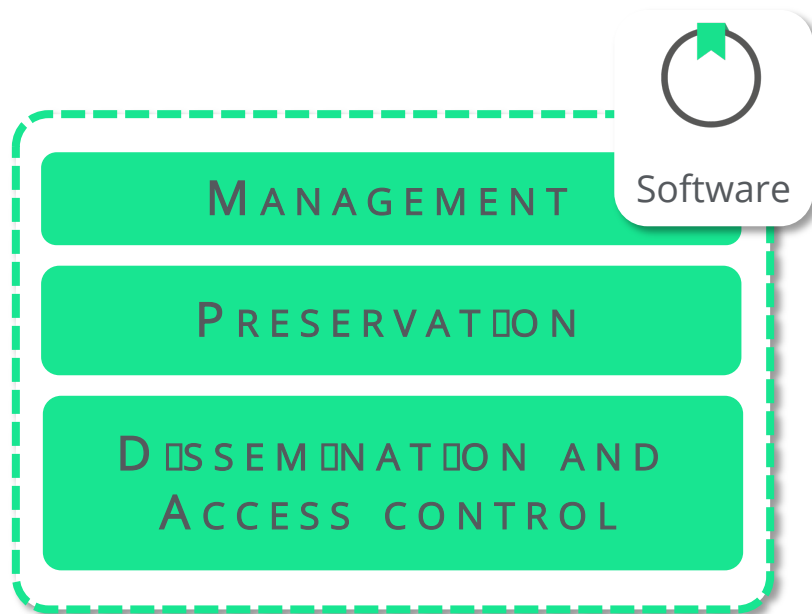

OUR PRESERVATION SERVICES

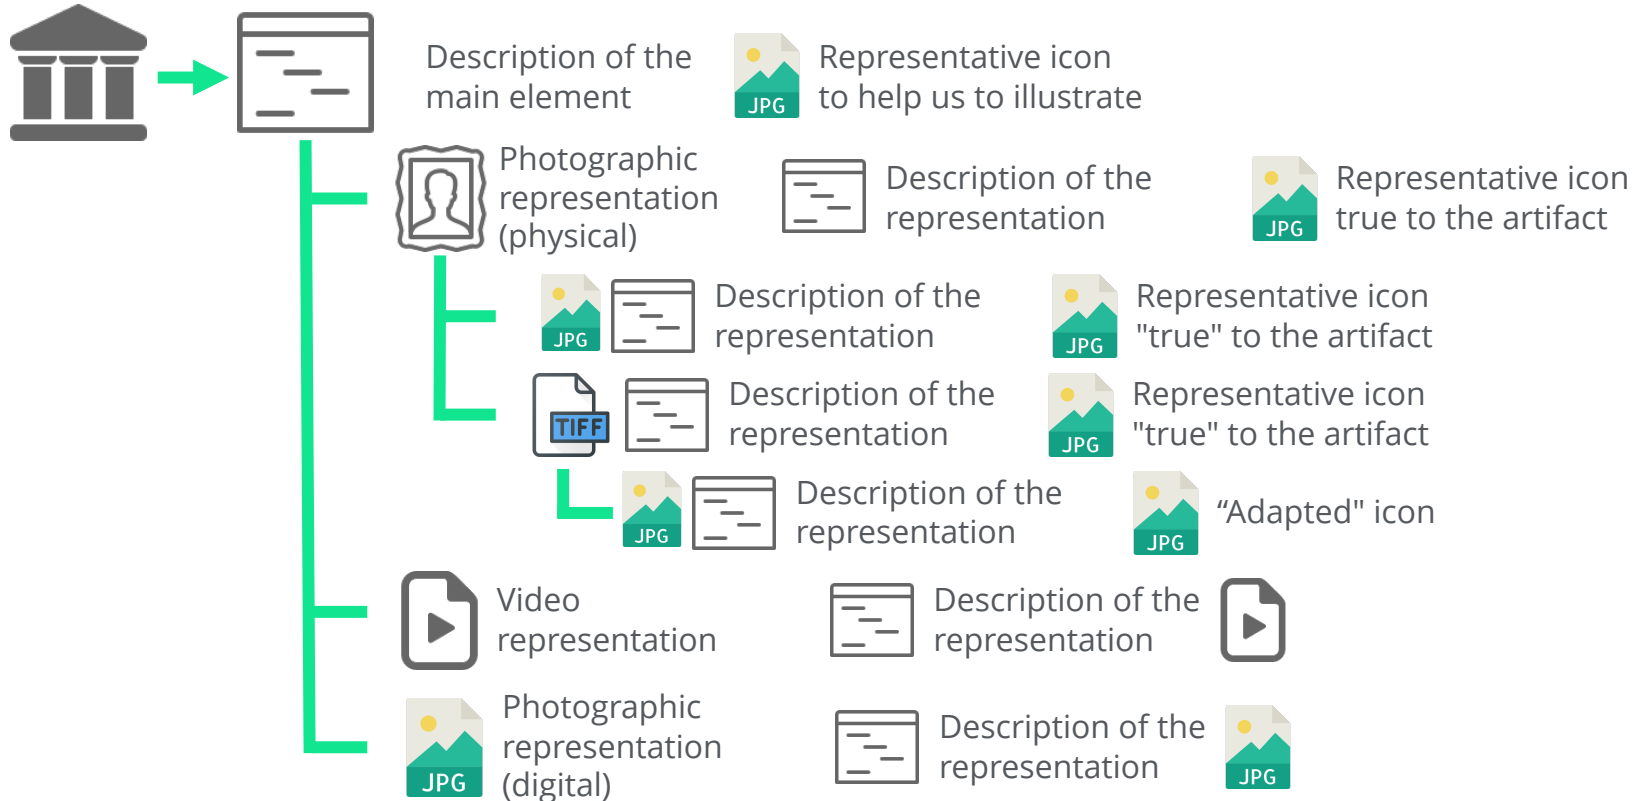

Much more than just SOFTWARE

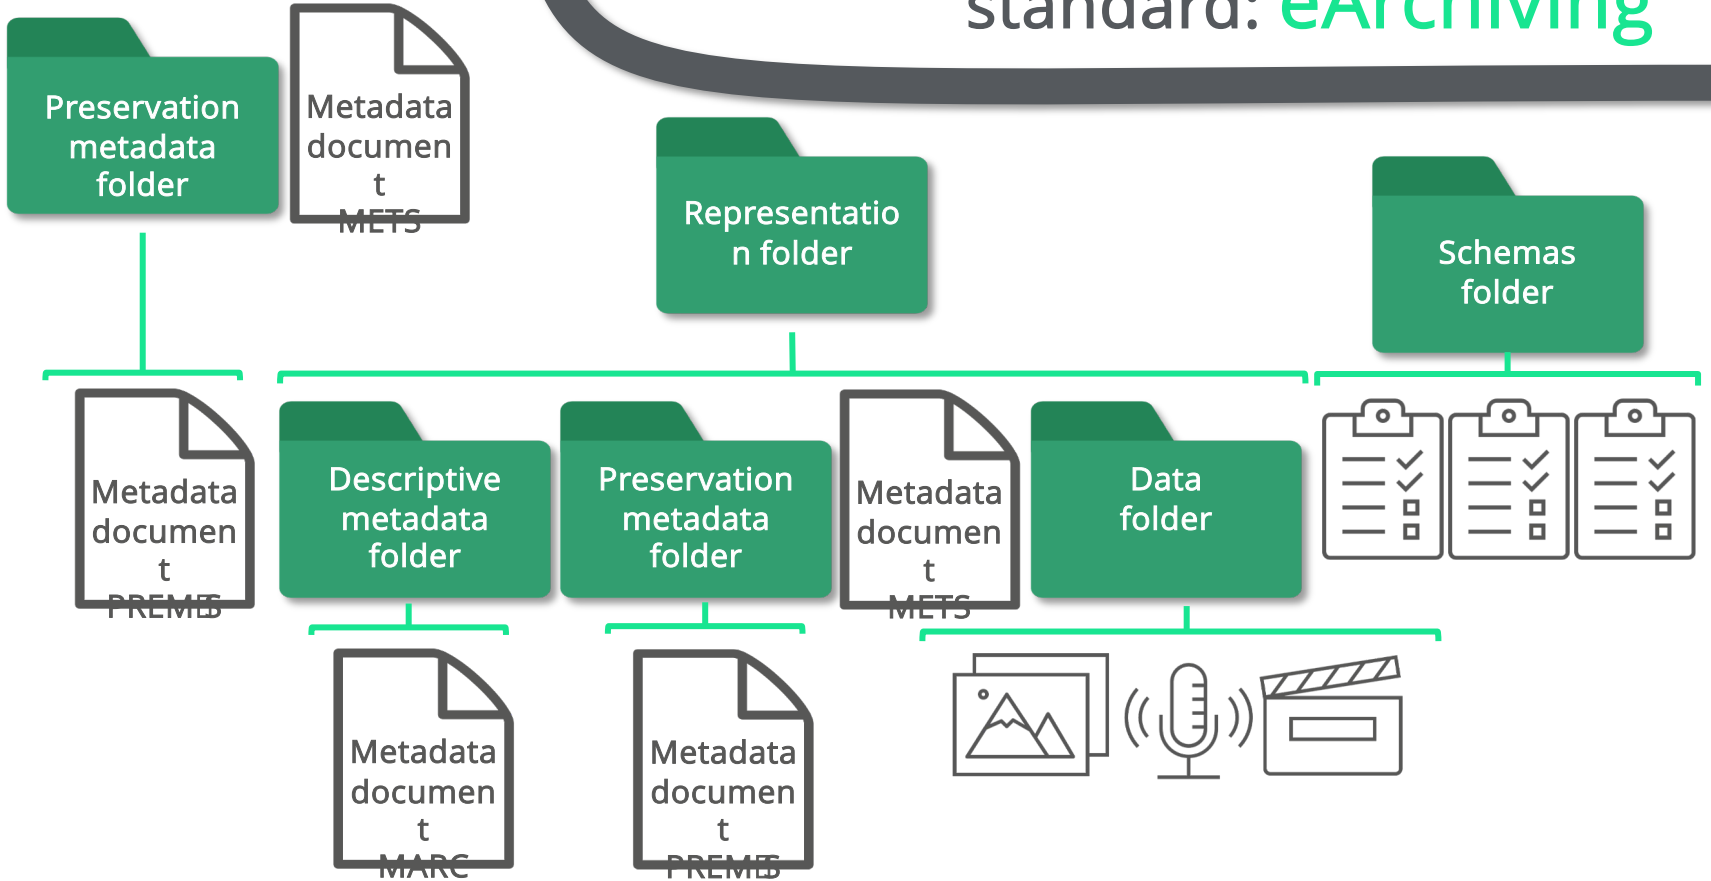

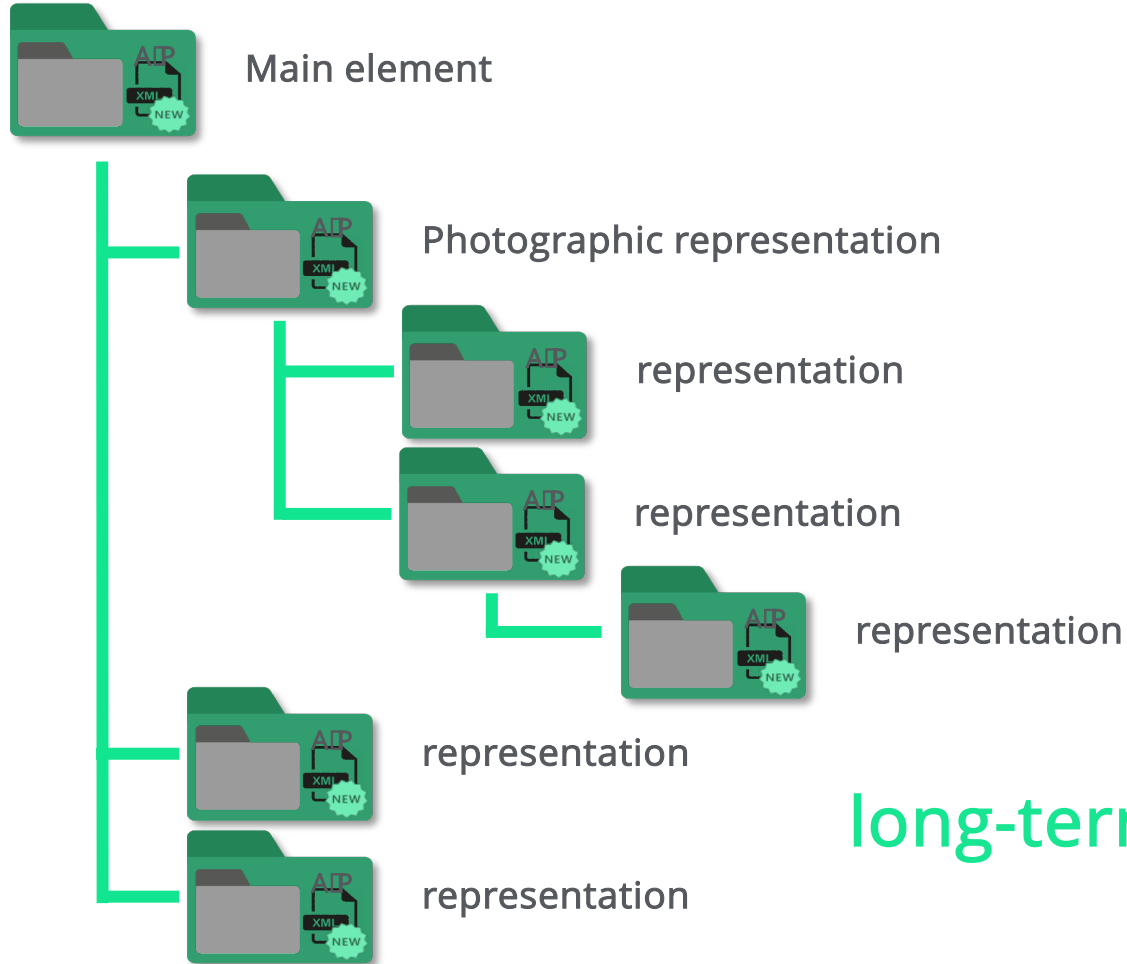

DEVELOPMENT OF ODL O PRESERVATION SERVICES ON eArchiving

The complexity of INFORMATION STRUCTURING in digital contexts

Towards an international standard: eArchiving

Structure for
long-term preservation

A model built on **AWS** services

QUICK ACCESS

PRESERVATION

BACKUPS

OAI ISO 14721 as the base of our model

DATABASE

Preserves metadata of records (and other file system items) and links between these items and digital objects

APPLICATIONS

Applications are the only system capable of correctly interpreting its own database and the different relationships that exist internally between data and the relationships with digital objects

REPOSITORY OF DIGITAL OBJECTS

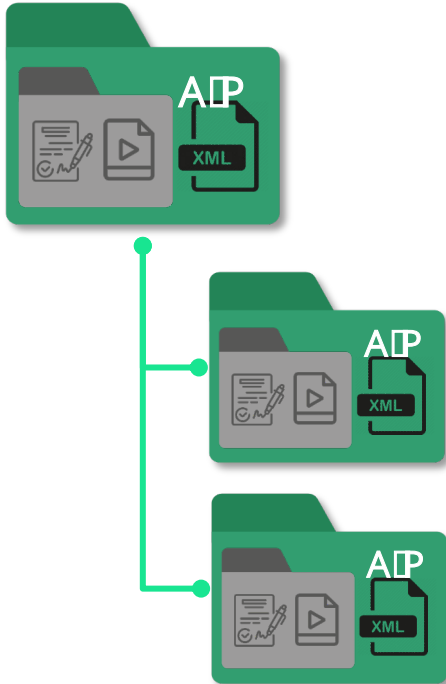

Electronic documents are part of the system, so they are stored in a repository of digital objects - standardized and self-understanding model.

A standardized and **self-contained** model
