eArchiving Overview

11 years of eArchiving

eArchiving mission (10 years)

- The eArchiving Initiative mission is to provide **non-hosted** archival services to keep digital records authentic and usable based on current **best practices**.
- The services address the **three main endeavours** of an archive: acquiring, preserving and enabling re-use of information.
- Archival processes at a pan-European level are **harmonised**, supported by guidelines and recommended practices that will cater for a **range of data** from different types of source including record management systems and databases.

eArchiving mission

- The potential benefits for public agencies, citizens and businesses are demonstrated by providing easy and efficient access to the archived records.
- The E-ARK approach is public-facing, **open source**, **robust**, replicable and **scalable**, and addresses a wide range of organisations, taking full account of legal constraints.

eArchiving: specifications and tools

- We have developed practical interoperability **specifications** for data preparation, ingest, preservation and access
- We have developed a set of Open-Source, interoperable **tools** which implement the specifications and are reusable across borders

E-ARK: core benefits

*Extended possibilities for collaboration
in tool development*

*Shared development = less cost for
each individual partner*

*Digital preservation is affordable for
everyone!*

The eArchiving Initiative in a nutshell

Service Contract: eArchiving Common Services Platform - CNECT/LUX/2021/OP/0077 NUMBER – LC-01905904

- **1 Research Institution: Austrian Institute of Technology (AIT)**
- **3 SME:** Keep Solutions (Portugal), Highbury (Ireland), Gabinete (Spain)
- **1 Membership organisation:** DLM Forum (Estonia)

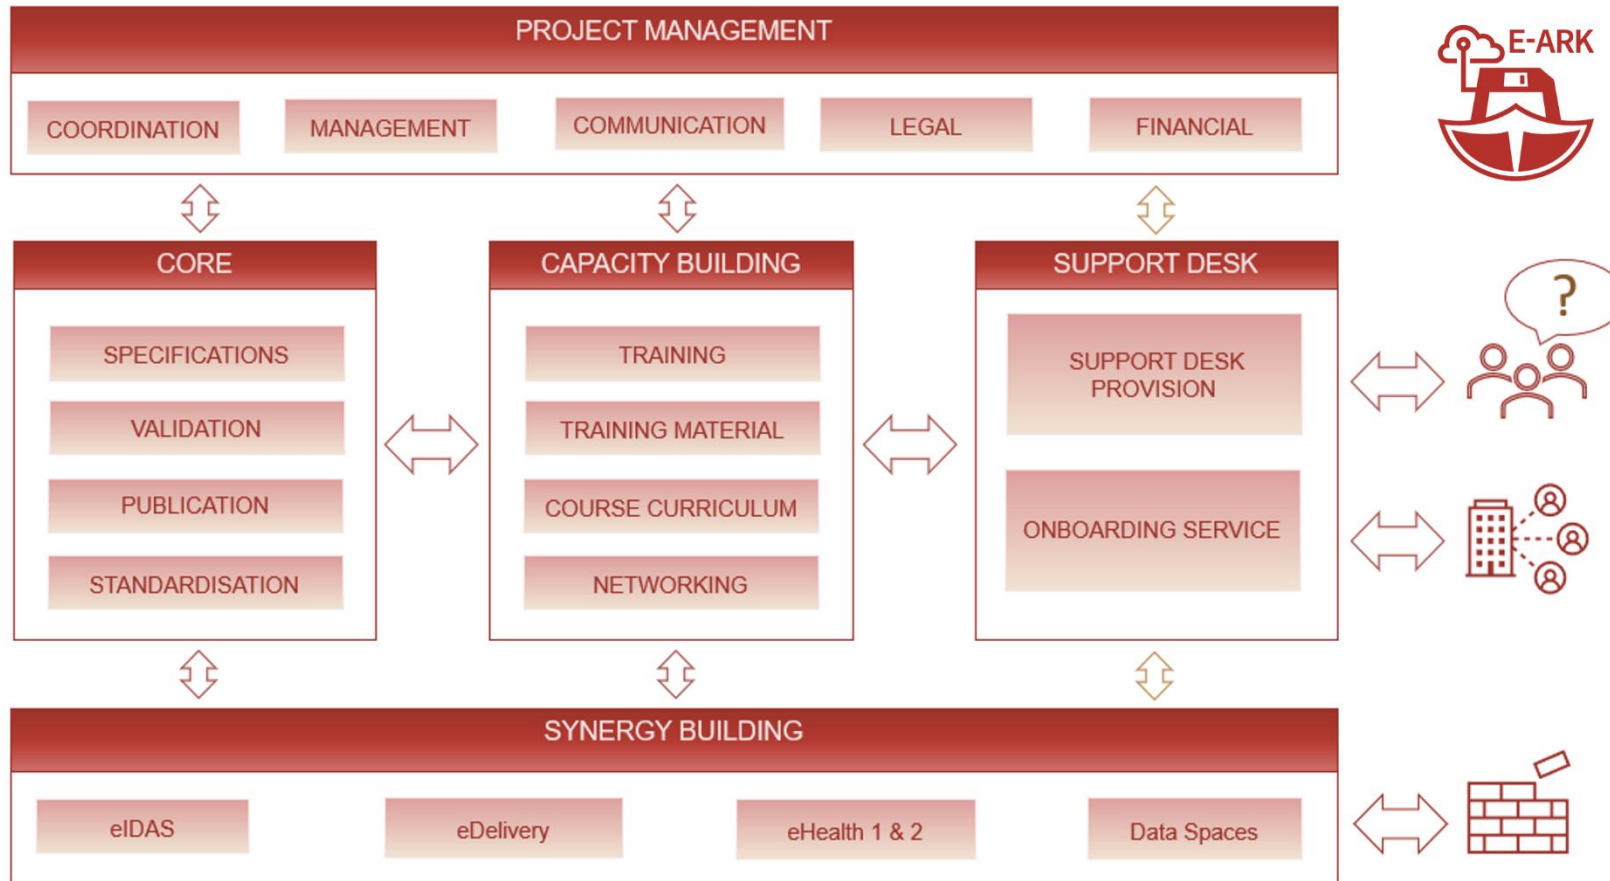

AIT Subcontractors

AAFB, Easy Lean, everteam, TrustScape, KMD, Prisma.

DLM Project Members

National Archives of Estonia, Finland, Norway, Slovenia, Swiss Federal Archives, **OPF**, Digital Lifecycle Management; Geoarh, Poliphon, XAMK, INESC-ID, SERDA, Sydarkivera, Penwern, Digital Lifecycle Management.

Specification documents

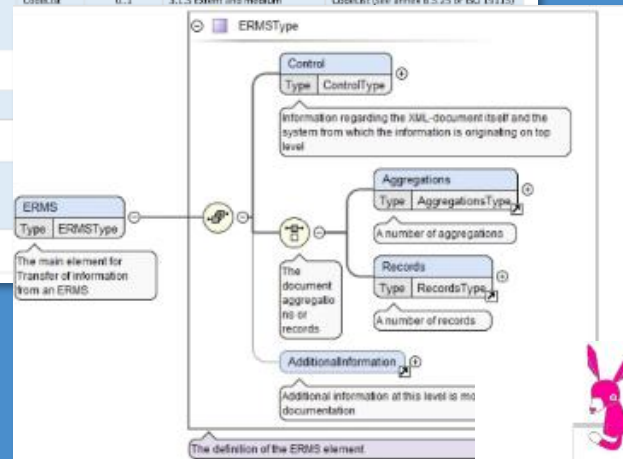

Specification

4.1 Proposed translation schema for the INSPIRE metadata descriptions for geospatial resources in ISAD(G)

The following table displays the identified counterparts of the required INSPIRE metadata elements used in the ISAD(G) structure. Initial elements are based on the INSPIRE Metadata Implementing Rules: Technical Guidelines, based on EN ISO 19115 version 1.3, and INSPIRE Metadata Implementation Rules at: http://inspire.jrc.ec.europa.eu/documents/Metadata/MD_IR_and_ISO_20131029.pdf.

INSPIRE el. nr.	INSPIRE el. name	Explanation	Metadata data type	Proposed Cardinality	ISAD code	Comments
2.2.1	Resource title	Name by which the cited resource is known	text	1..1	3.1.2 Title	
2.2.2	Resource abstract	Brief narrative summary of the content of the resource(s)	text	0..1	3.1.1 Scope and content	
2.2.3	Resource type	Scope to which metadata applies	CodeList	0..1	3.1.5 Extent and medium	CodeList (see annex B.5.25 of ISO 19115)
2.2.5	Unique resource identifier	Value uniquely identifying an object within a namespace				
2.2.6	Disputed resource	Provides information about the datasets that the service operates on				
2.2.7	Resource language	Language(s) used within the datasets				
2.3.1	Topic category (INSPIRE specific)	Main theme(s) of the dataset				
2.3.2	Spatial data service type	A service type name from a registry of services

E-ARK Software (not a hosting Service)

The screenshot shows the GitHub repository page for E-ARK Software. The header includes navigation links for Product, Solutions, Open Source, and Pricing, along with a search bar. The repository name "E-ARK Software" is prominently displayed, followed by a description: "Sample Software of the E-ARK Programme and eArchiving Building Block". It shows 6 followers, is located in Europe, and has a link to the E-ARK website. Below the repository name, there are tabs for Overview, Repositories (21), Projects (1), Packages, and People (2). The "Pinned" section features two repositories: "py-eark-ip-validator" (Python, 2 stars, 2 forks) and "commons-ip" (Java, forked from keeps/commons-ip). The "Repositories" section lists three repositories with their respective details and commit history graphs:

- E-ARK-Software.github.io** (Public): Background and context for the E-ARK Software projects. Updated yesterday. 0 stars, 0 forks, 0 commits, 0 issues.
- py-eark-ip-validator** (Public): E-ARK Python Information Package validation library. Updated last week. 2 stars, 2 forks, 2 commits, 1 issue.
- commons-ip** (Public): The RODA Commons IP provides an API to manipulate Information Packages. Updated 2 weeks ago. 0 stars, 0 forks, 12 commits, 0 issues. License: LGPL-3.0.

Validation and Conformance Services

<https://digital-strategy.ec.europa.eu/en/activities/earchiving-conformance-seal>

Validation and Conformance

1. Validation

Validation is the process of **testing a single Information Package (IP)** file for conformance. You can start by verifying if individual information packages of your digital repository or archival solutions are valid by using the **Validation Service** to test if your information packages are conformant with E-ARK specifications.

Validation
Service

2. Self-assessment conformance

eArchiving conformance of a digital archive or archiving solution includes **to meet the E-ARK requirements for ingest and processing of Information Packages**, in addition to the validation of a representative sample of information packages.

Self-Assessment

3. Conformance application review

A brief interview with the eArchiving Team is arranged to review the evidence provided and verify the implementation of E-ARK **requirements for ingest and processing of Information Packages**.

Apply for a
Review

4. Seal

After successful review the **eArchiving Conformance Seal** is awarded by the European Commission.

The DILCIS Board

The Digital Information LifeCycle Interoperability Standards Board (DILCIS Board) develops, publishes and supports standards which provide practical interoperability in digital archiving

eArchiving Capability and Maturity Model v2.2 (.ZIP file)

The eArchiving Capability and Maturity Model is an instrument for organisations to conduct a self-assessment and guide them regarding their capability on the core individual digital preservation process areas (namely, pre-ingest, ingest, preservation planning, data management, archival storage and access).

eArchiving Reference Architecture v2.0

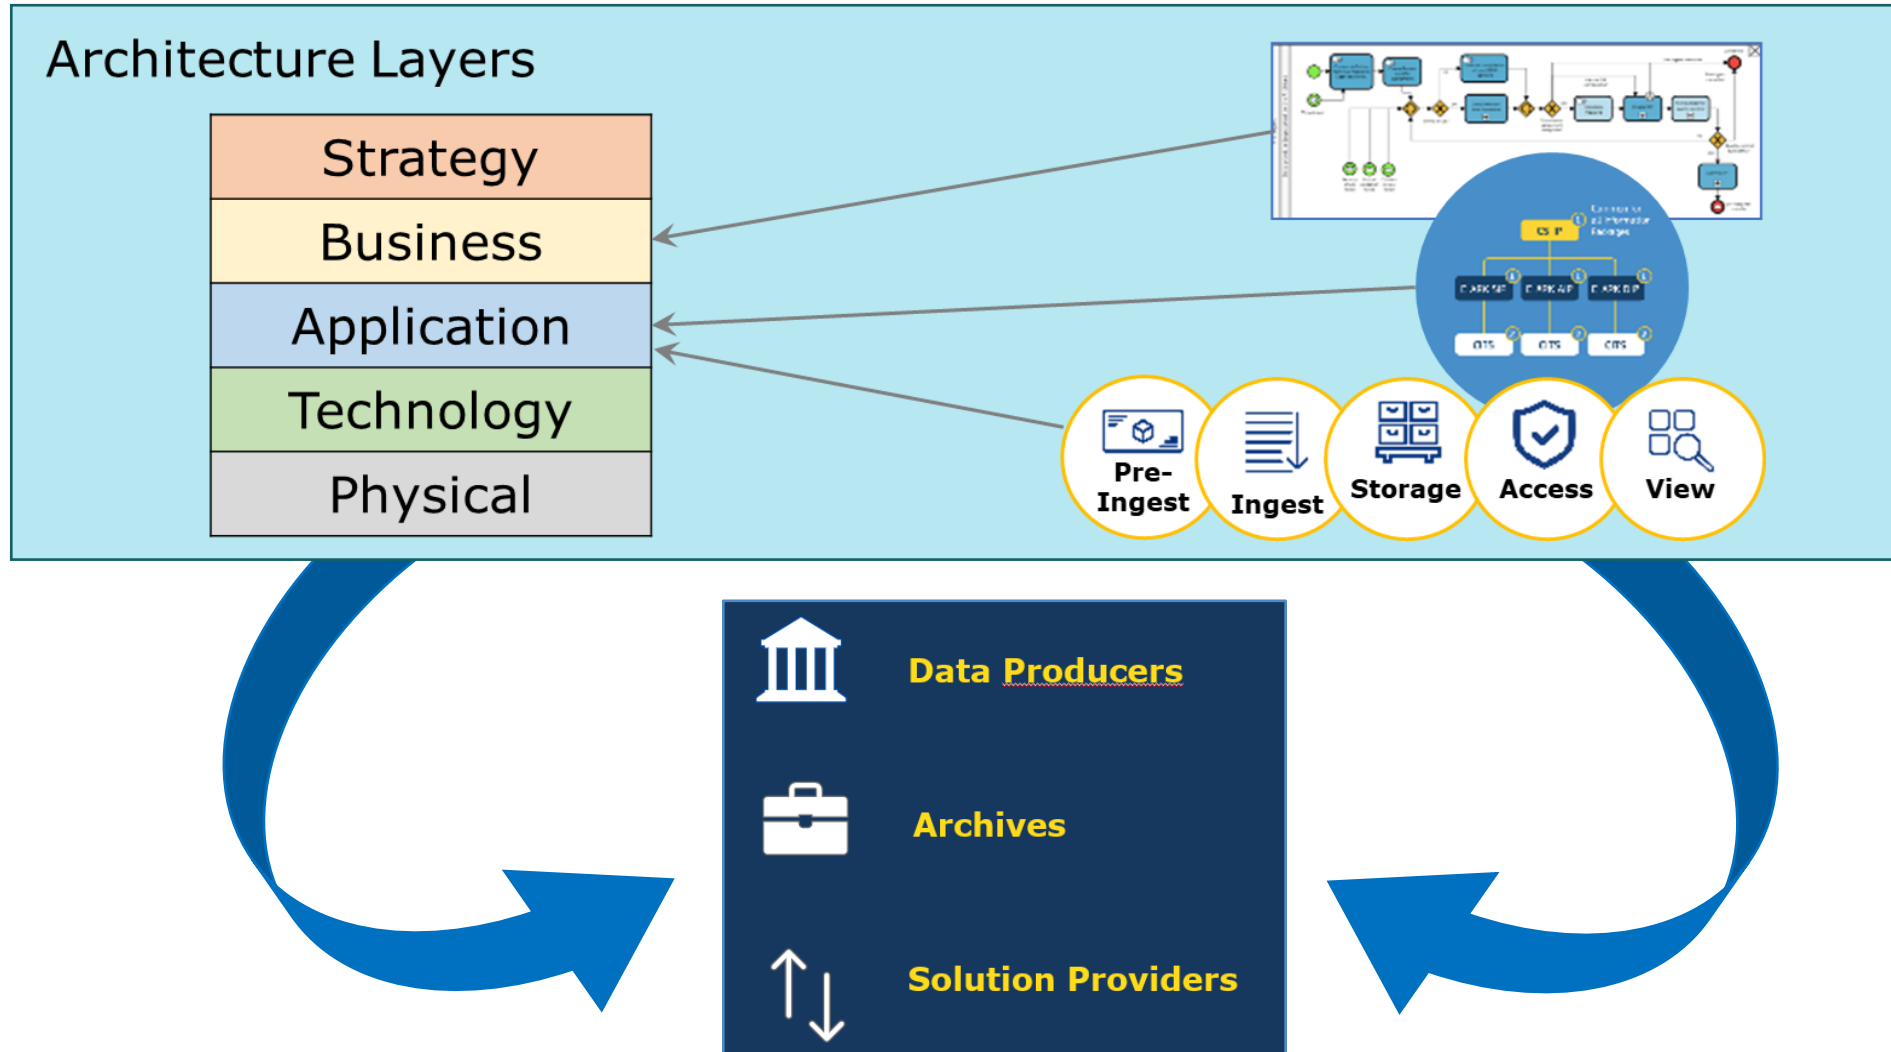

This reference model of digital archiving has been created by the CEF eArchiving Building Block in cooperation with the E-ARK Consortium.

Previous Versions:

- *eArchiving Reference Architecture v1.0 (deprecated)*
- *E-ARK General Model (deprecated)*
- *eArchiving Capability and Maturity Model v1.0 (.ZIP file) (deprecated)*

Archiving by Design

This document was prepared for the [The European Archives Group \(EAG\)](#). It provides a definition of Archiving by Design. It also recommends that the concept of sustainable accessibility to information is the premise for a pan-European approach for the records management community and archives to address the challenges of digital trans

The eArchiving Stakeholders

The eArchiving Initiative is built upon shared knowledge and experiences, which are the basis for creating the eArchiving community and increasing capacity building within the various constituent organisations:

Data producers	Those entities that are, or expect to be in the future, directly or indirectly responsible for depositing content in a digital archive for long-term digital preservation, which guarantees that information remains available, have not changed over time and retains the legal value.	Guidance
Archives	Those entities that are, or expect to be, directly or indirectly responsible for the governance of a digital archive, which provides long-term digital preservation.	Guidance
Solution providers	Those entities that are, or expect to be in the future, providers of technology or services for digital archives or for data creators.	Guidance

Support Services

<https://digital-strategy.ec.europa.eu/en/activities/support-provision-and-onboarding-services>

The eArchiving Support desk

The [eArchiving support desk](#) is the primary contact point for institutions and organisations to whom we provide support regarding questions and requests related to the eArchiving specifications and components.

We offer the following services:

Support desk provision

The support desk is set up to address issues, questions, and feedback that organisations and institutions might have related with any eArchiving service.

Onboarding service for new organisations

This service aims to assist and give guidance to organisations and institutions that want to implement or receive training in the eArchiving specifications and components.

You can contact us via email (support@e-ark-foundation.eu) for your questions, comments about eArchiving and advice on implementing, integrating and testing in your solution!

Check the [privacy statement](#) before sending your questions and comments.

Training Services

<https://digital-strategy.ec.europa.eu/en/activities/earchiving-training>

eArchiving - training and curriculum

eArchiving offers training resources to promote understanding of eArchiving services and simplify long-term access to information.

As digital records proliferate, organisations face increasing pressure to manage their digital archives to comply with statutory and business requirements. These digital archives play a vital role in safeguarding our records: national, regional and local; business and public; social, cultural and scientific; and personal.

To support organisations, the eArchiving Initiative provides specifications, tools and reference software based on international standards for describing, transmitting and preserving digital data.

eArchiving Training

The training will take the form of webinars, face-to-face training sessions and a library of standalone multilingual training resources. Training will target digital archiving skills encompassing short, medium and long-term preservation, concentrating on the E-ARK tools and standards.

Take a look and get the materials of the eArchiving training sessions on the [eArchiving webinars website](#) and the [recordings of the past](#) sessions to know more.

eArchiving Curriculum

The academic curriculum will complement the industry-based training, with the focus on Masters courses. The curriculum will be released and presented soon. Whether you are beginning your eArchiving journey or are a more advanced user, there is something here for you!

If you have any questions or comments about this page, or eArchiving in general, please visit the [eArchiving Initiative support desk](#).
