

Welcome to this live webinar on Archiving databases: Why, what and how?

Start 10:00

20 June 2025

Audience notes for the Live Webinar

Your **cameras have been turned off** and **microphones muted**.

If you have any technical issues during the event, please use the chat function.

Please **use the Q&A for questions to speakers**. These will be addressed at the end of the event.

Please note that this webinar is recorded. No attendee personal information will be captured in these recordings.

Agenda

10:00 – 10:05

eArchiving Initiative welcome

Jaime Kaminski – eArchiving Initiative

10:05 – 10:50

Archiving databases: Why, what and how?

Koit Saarevet, National Archives of Estonia

10:50 – 11:00

Q&A

Archiving databases: Why, what and how?

Koit Saarevet, National Archives of Estonia

eArchiving Initiative Training Webinar

Contents

1. Legal
2. Database models
3. What to archive?
4. Process
5. Descriptions
6. Tools

LEGAL

Archives Act

- Subsection 2(1): A record is information recorded on any medium /.../.
- Subsection 2(2): Archival records are records to which archival value has been granted by a public archives as the result of an appraisal.
- Subsection 2(4): Archival records created or received in the course of performance of public duties shall be transferred to the National Archives /.../.

<https://www.riigiteataja.ee/en/eli/521032019019/consolide>

Archives Act

- Subsection 2(1): A record is information recorded on any medium /.../.
- Subsection 2(2): Archival records are records to which **archival value has been granted by a public archives as the result of an appraisal.**
- Subsection 2(4): Archival records created or received in the course of performance of public duties shall be transferred to the National Archives /.../.

<https://www.riigiteataja.ee/en/eli/521032019019/consolide>

NAE appraisal decisions

- HO 51/2017: Identification of databases with archival value
- Institutional appraisals, where AV is given to a specific database
- Other appraisals, if a series that received AV in them has moved to a database

NAE appraisal decisions:

DATABASE MODELS

Database models

- Relational
- Tree
- Network
- Object
- Document
- Star
- ...

} NoSQL

SQL = Structured Query
Language

```
SELECT * FROM city;
```

NoSQL

Non-SQL → non-relational

Not only SQL

Relational database

- Data is stored in tables and columns
- Relationships between tables are through the values of data fields
- ... i.e. if two tables are related, they must have a column with the same meaning

city
123 ID
ABC Name
ABC CountryCode
ABC District
123 Population

country
ABC Code
ABC Name
ABC Continent
ABC Region
123 SurfaceArea
123 IndepYear
123 Population

WHAT TO ARCHIVE?

Osakud

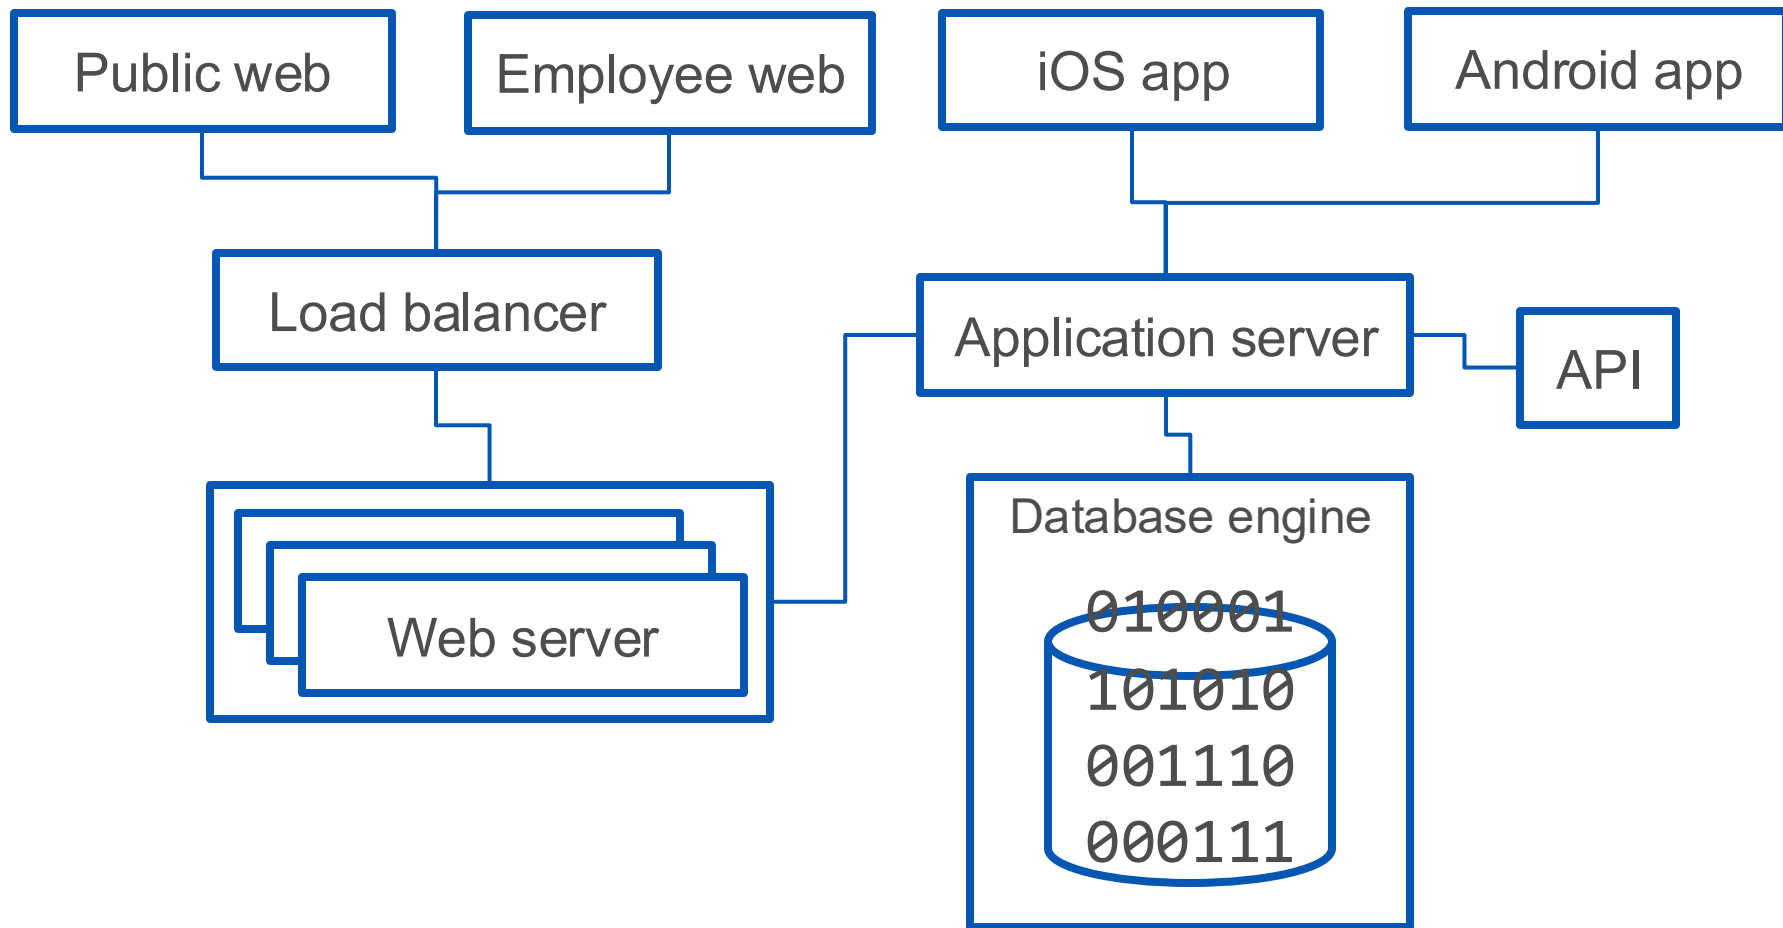

Aruanded

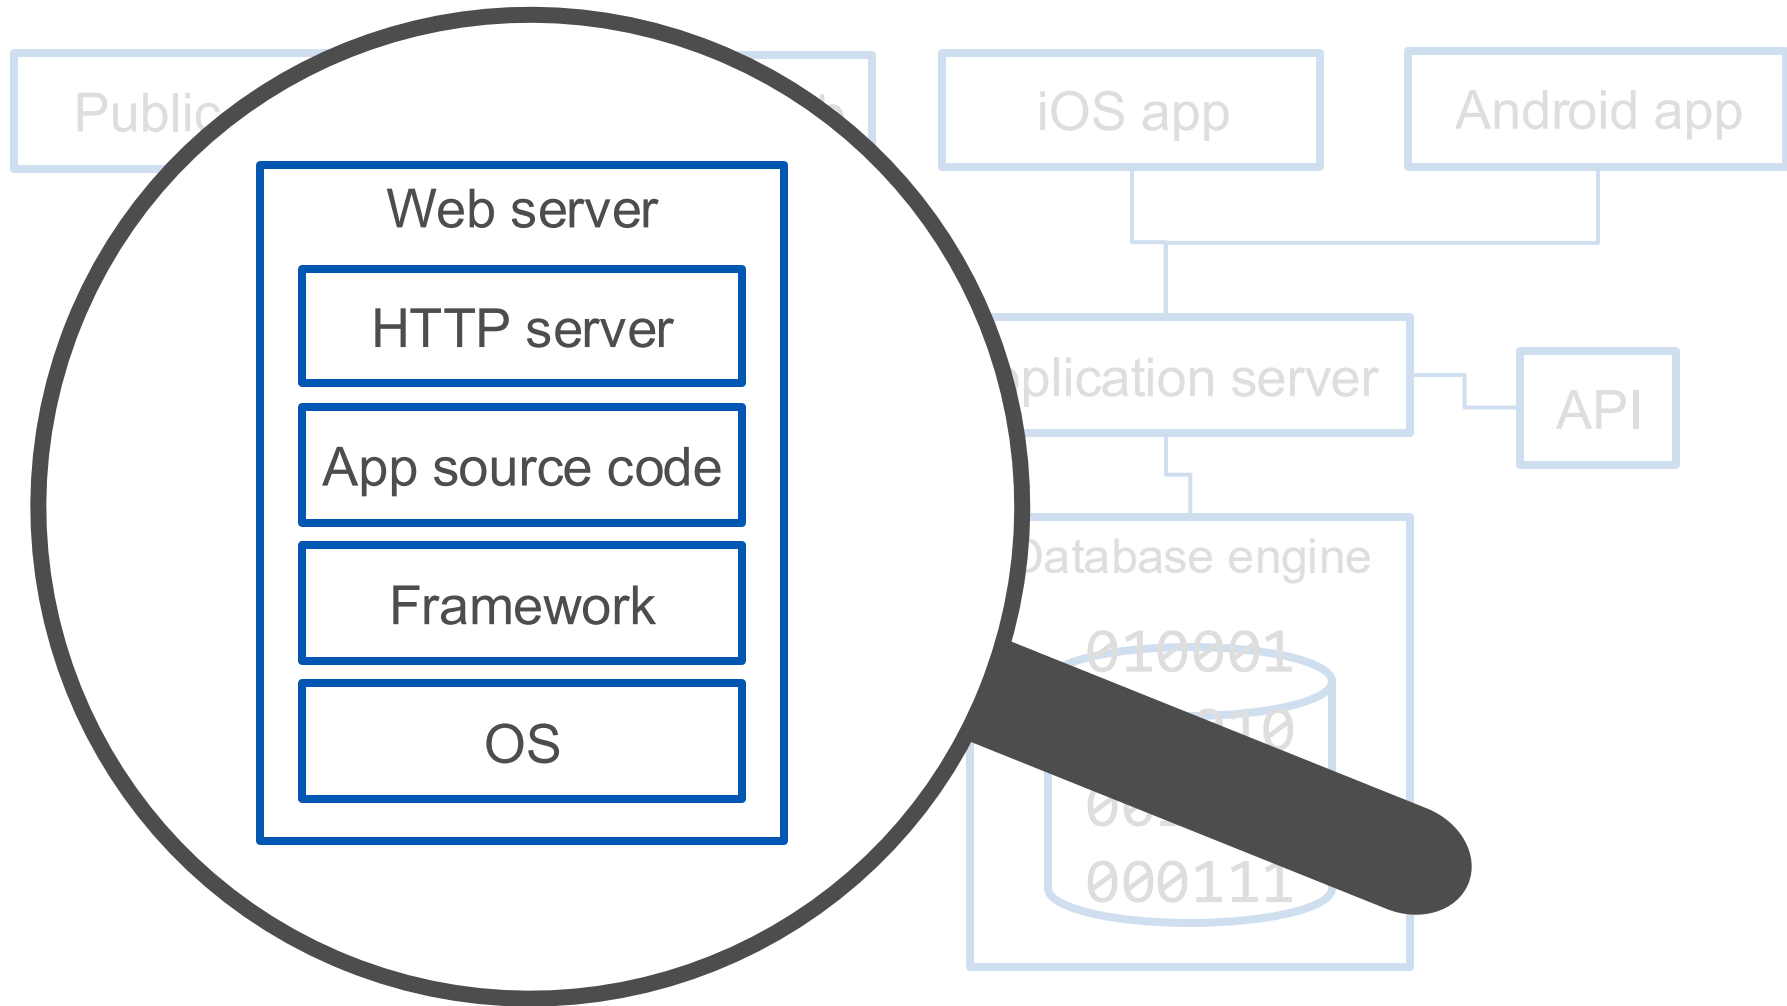

Teenindus

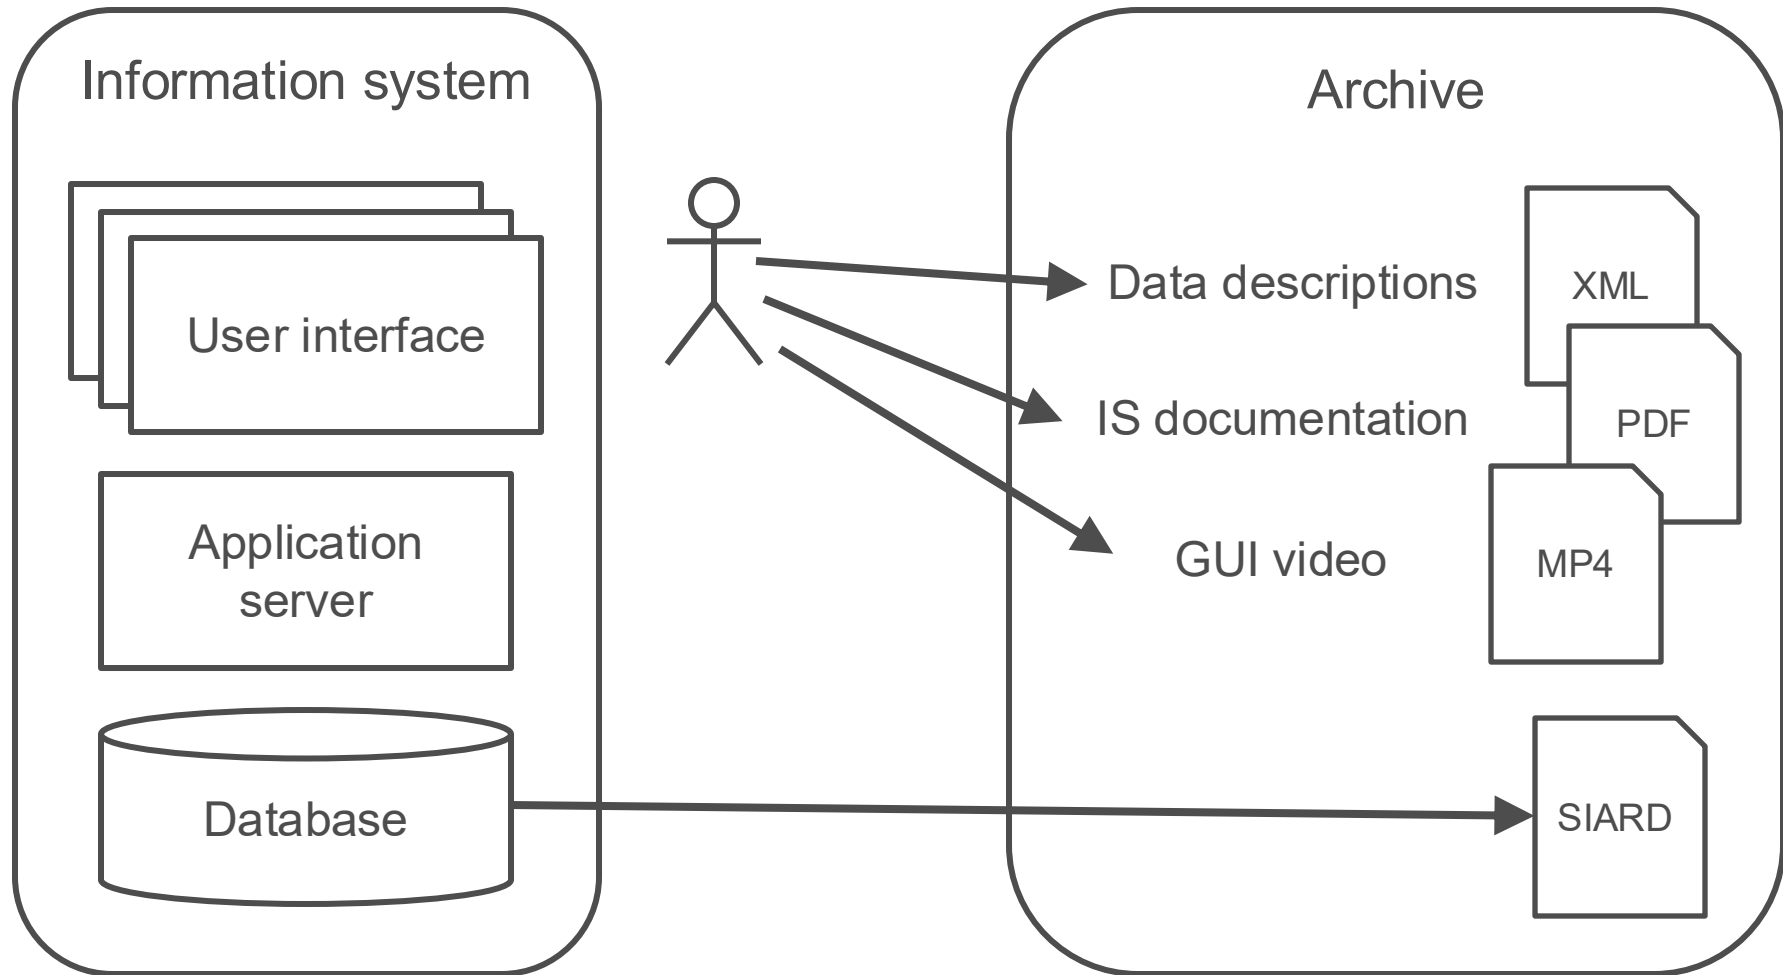

Quit

<osaku> arve Avamine (Uorm2)
osakute Mahakandmine (Uorm2a)
Tööaastad kaardile (U_3&U_ADD)
korteriite Ostmine (Uorm4)
Kinkimine või pärimine (Uorm5)
osaku kandmine Panka (Uorm6)

Tööaastate Loovutamine (Uorm A)
Tööaastate taGastamine (Uorm T)
KompeNsats. asendamine (U_YUR)
Tööosakute taSaarveldus

SIARD =
Software Independent Archiving of
Relational Databases

010001

101010

001110

000111

```
<siardArchive>
```

```
  <dbname>FR</dbname>
```

```
  <description>Forest registry
```

```
  </description>
```

```
  <archiver>Koit Saarevet
```

```
  </archiver>
```

```
  ...
```

```
</siardArchive>
```

SIARD

- De facto standard for archiving relational databases (used in most government archives worldwide)
- First issued in 2004, major updates in 2008 and 2016, smaller ones 2019 and 2021
- <https://dilcis.eu/content-types/siard>

PROCESS

1. Initiation

2. Kick-off

3. Cloning the DB

4. Test snapshot 1

5. Appraisal

6. Test snapshot 2

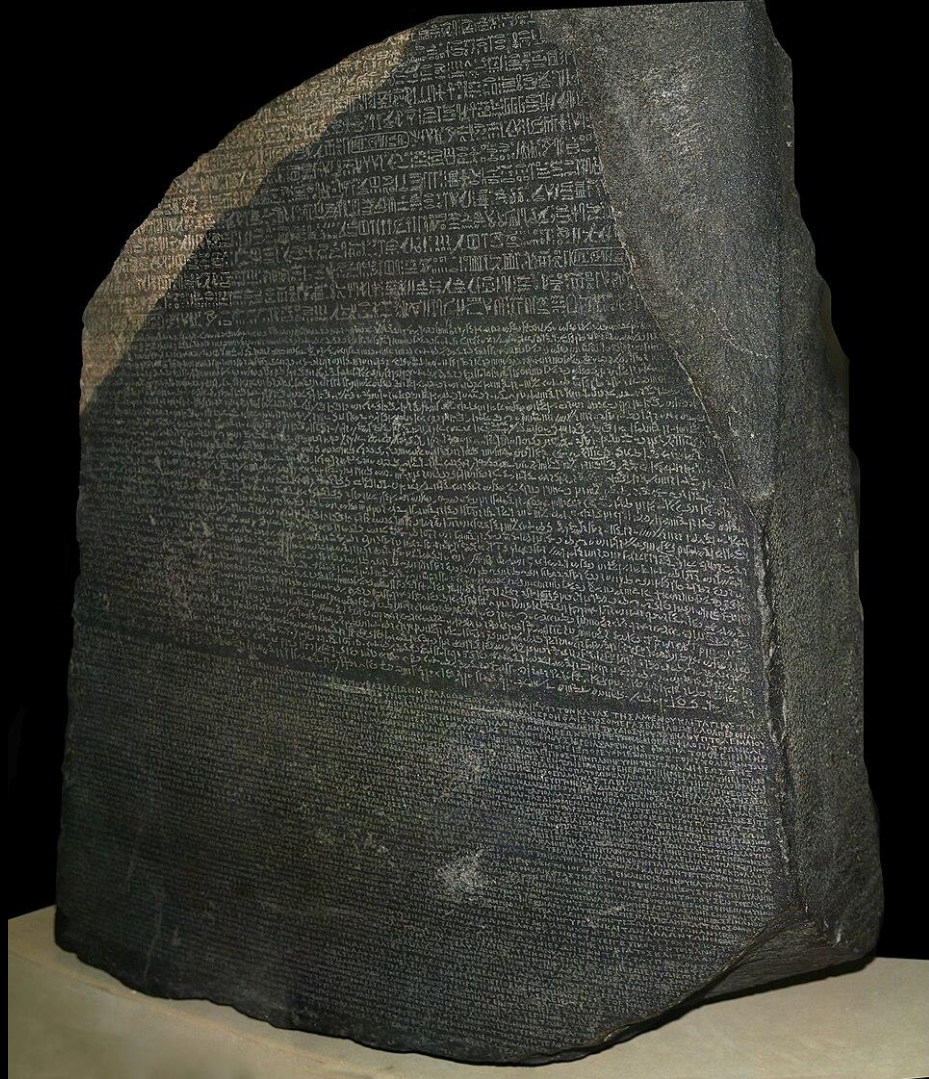

7. Final snapshot

8. Documentation

9. Finalising

DESCRIPTIONS

Archival descriptions

- Title
- Dates
- Archival history
- Scope and content
- ...

Technical documentation

- Data model (conceptual, logical, physical)
 - Table and column descriptions
 - Entity-Relationship Diagram
- Data descriptions (semantics, ontologies)
- Architecture
- User guides
- ...

6

TOOLS

DBeaver

Database Preservation Toolkit (DBPTK)

- Open-source solution for
 - Creating SIARD files
 - Simple full-text search of data stored in a SIARD file
 - Visualisation of database structure
- Developed by KEEP Solutions (Portugal)
 - <https://www.database-preservation.com/>
 - <https://www.keep.pt/en>

Import modules

Streaming data model

Export modules

Create a SIARD file of „world“ database

- Open dbptk-desktop
- Select „Create“
- Select „MySQL“
 - Hostname: localhost
 - Port number: /do not change/
 - Username: /enter your database admin user name/
 - Password: /enter your database admin password/
 - Database: world
 - Disable Encryption: yes
- Follow the wizard, create the database snapshot!

DBPTK Developer command line

- Instructions at:
<https://github.com/keeps/dbptk-developer/wiki/Application-usage>

Thank you
